### Additional Information:

Composition and Origin (weights are approximate)	
Lecithin derived from soy, Non-GMO (USA)	287mg (0.01 ounce)
Kosher bovine gelatin caps (France)	73 mg (0.0026 ounce)
Cholecalciferol - vitamin D3 (USA)	0.3mg (0.00001 ounce)
Dye	
FD&C Blue 1 (FDA-approved)	
There is no coloring in the oil.	

The dosage and formulation have been intelligently designed:

- The hard gel cap for stability
- The digestible oil for consistency of potency (mixing), stability and absorption

Maximum D3® conforms to USP standards <581> for purity, <2091> for weight variation, and <2040> for disintegration and dissolution and conforms to available USP standards for ingredients.

**PLEASE NOTE: Each production lot is tested prior to distribution. Ingredients are also tested prior to production and later testing is done for evidence of contamination or degradation.**
